

KUMAR SHUSHANK RANJAN

DEVOPS ENGINEER

☎ +91-8409807662 ✉ shushankranjan07@gmail.com [in LinkedIn](#) [GitHub](#)

SUMMARY

DevOps Engineer with hands-on experience building production-grade infrastructure on AWS using Terraform, Lambda, API Gateway, DynamoDB, and Cognito. Proficient in serverless architecture, Infrastructure as Code, CI/CD pipelines, and automated deployments.

SKILLS

Cloud & Infrastructure: AWS (EC2, Lambda, API Gateway, DynamoDB, S3, CloudFront, Cognito, IAM)

DevOps & Tools: Docker, Terraform, Kubernetes, Ansible, GitHub Actions, Git, Bash, Linux, SDLC

Programming: Python, Java, SQL

EXPERIENCE

Cyber Security Intern

March 2025 – May 2025

Dataview Analytics (Remote)

Python, SQL, Blockchain, Excel

- Analyzed and standardized **100,000+** rows of security and transaction data across multiple regions to support threat monitoring and weekly analytics pipelines.
- Assisted in evaluating **blockchain-based data integrity mechanisms** to ensure tamper-proof audit trails for sensitive records across distributed systems.
- Automated reporting workflows using Excel and SQL, **reducing manual reporting effort by 40%**

PROJECTS

Serverless URL Shortener | AWS Lambda, API Gateway, DynamoDB, Cognito, Terraform, Python

January 2026

- Built a production-grade serverless URL shortener on AWS for authenticated link creation and sub-10ms public redirects via HTTP 301.
- Provisioned 18 AWS resources using Terraform IaC with S3 remote state and DynamoDB locking for fully reproducible, zero-click infrastructure deployments.
- Secured API endpoints via Cognito JWT auth at the API Gateway layer, blocking unauthenticated requests before Lambda execution to reduce attack surface and cost.

Kubernetes-Native App Platform | Docker, Kubernetes, Ansible, Python, EC2, GitHub Actions

February 2026

- Automated 3-node K8s cluster provisioning using Ansible playbooks across EC2 instances, reducing manual setup to a single idempotent playbook run.
- Built a GitHub Actions CI/CD pipeline using Docker and kubectl for zero-touch rolling deployments on every commit with zero downtime.
- Configured HPA at 60% CPU threshold using K8s autoscaling and ConfigMaps, achieving min 2 / max 6 replica scaling without manual intervention.

Static Website CI/CD Pipeline | S3, CloudFront, CodePipeline, CodeBuild, IAM, Terraform

March 2026

- Built a fully automated AWS CI/CD pipeline deploying a static website globally on every GitHub push with zero manual intervention.
- Configured CloudFront with Origin Access Control (OAC) to serve a private S3 bucket over HTTPS across 400+ edge locations, eliminating direct S3 exposure.
- Authored CodePipeline + CodeBuild workflow via GitHub Connections (V2) with buildspec.yml for automated S3 sync on every commit; provisioned all infrastructure using Terraform with remote state and least-privilege IAM.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900) - 2025

EDUCATION

Master of Computer Application

2025 – 2027

Kristu Jayanti University

Bengaluru, Karnataka

Bachelor of Computer Application

2022 – 2025

Graphic Era University

Dehradun, Uttarakhand
